Dear Sir:

Dated: 12/16/01

Applicant wishes to point out that in line with the examiner's admonition found in paragraph No. 1 of the office action dated September 13, 2001 the amendment dated June 25, 2001 has been carefully reviewed. As a result of this careful review new clean pages 4 and 6 are enclosed herewith. The clean pages 4 and 6 submitted with the June 25, 2001 amendment were incorrect because the additions made to the specification made the pages run over and when the clean pages were made on the word processor the pages did not come out in a fashion to make the sentences bridging the pages complete.

Specifically the new clean page 4 submitted with this amendment differs from the clean page 4 submitted with the June 25, 2001 amendment in that "different and as usual inconsistent." has been added at the end of the page after the words -----in most cases, be-----. On page 6 the word "steel" has been added as the very first word on this page whereas in the page 6 submitted with the amendment of June 25, 2001 this word was missing, having appeared as the last word on page 5 of the original specification.
